

Quality, environmental, and energy policy

- Environmental protection, energy efficiency, and resource conservation are top priorities in our business practices!
- Motivation and commitment are prerequisites for high quality, energy, and environmental standards in the company. That is why we at ASB Group GmbH place great value on motivated employees!
- We understand quality assurance and energy- and environmentally-conscious behavior as a dynamic system that is supported by every individual in the company!
- We constantly strive to further develop and improve our quality, energy, and environmental standards! This is communicated both internally and externally and implemented in a system of objectives!
- We use an integrated management system to improve our quality, energy, and environmental performance! The necessary resources are continuously invested in this system in order to further develop it.
- We strive to use our vehicle and machine fleet in an ecological, energy-efficient, and economical manner, as well as to use energy, consumables, and packaging materials sparingly and dispose of them in an environmentally friendly manner!
- We comply with and implement applicable guidelines, laws, and standards relating to environmental protection and energy issues!
